

PRESS RELEASE

Vogelsang attends the digital EuroTier and EnergyDecentral 2021

- **Virtual product news and high-performance technology exchange**

Essen (Oldenburg), January 28, 2021 – [Vogelsang GmbH & Co. KG](#) will be taking part from **9 to 12 February** at **EuroTier** and **EnergyDecentral**, which are being held in digital form for the first time. The focus will be on the latest product innovations for economical liquid manure spreading and delivery as well as technology and components for efficient biogas production.

“We are excited about the digital realization of the two trade fairs and look forward to entering into dialog with visitors in this way. It is particularly important to us at this time to maintain our close relationship with customers and respond to market requirements,” says Harald Vogelsang, Managing Director of Vogelsang GmbH & Co. KG. He adds: “For discussions and questions, several Vogelsang experts will be available via video calls or chat.”

Optimization and retrofitting of biogas plants

In the biogas sector, Vogelsang will be presenting its proven product portfolio for efficient biogas production and digitization of biogas plants. The showcase will focus on powerful pumps, macerators and solid matter feeders as well as disintegration technology and intelligent control technology. EnergyDecentral visitors can also inquire about completely preassembled system solutions. Vogelsang tests the entire unit in the factory before delivery, which means that it only needs to be installed and connected to the power supply on site.

Innovative technology for liquid manure spreading

The agricultural segment revolves around economical distribution of liquid manure close to the ground. After its debut at the company’s virtual in-house trade fair in November 2020, Vogelsang will provide information about the UniSpread linkage and the BlackBird trailing shoe system with a working width of 24 meters at EuroTier. Further highlights include the SyreN process for stabilizing liquid manure and other optimized components for future-proof liquid manure management.

Vogelsang is also expanding its digital offering with its own **360-degree showroom**. The virtual showroom lets visitors interactively explore new products from the agricultural technology sector via various touchpoints.

About Vogelsang:

Vogelsang GmbH & Co. KG develops, produces and distributes highly-engineered equipment that is easy to maintain. The head office is located in Essen (Oldenburg) in Lower Saxony. Founded in 1929 as a manufacturer of agricultural machinery, the company has grown to become a specialist in individually configurable machines for the agricultural technology, biogas, industrial, transportation, and wastewater sectors. At present, the mid-sized, innovative family business employs over 1000 people worldwide. Vogelsang ensures the highest production quality through its research, development and manufacturing operations at its location in Germany. As an international company, Vogelsang operates manufacturing centers domestically and abroad. A continuously growing network of subsidiaries and representatives allows Vogelsang to be present in more than 25 locations worldwide, in all European countries and important industrialized nations in the world. The company has been awarded several times the title of “Germany's innovation leader” by the Prognos AG economic research institute.
