

PRESS RELEASE

One linkage, four working widths: BlackBird 30 meter offers even greater flexibility

- **Genuine four-time folding to the selected working width without any overhang**
- **Compact, accurate distribution: ExaCut ECM precision distributor without air suction**

Essen (Oldenburg), Germany, October 5, 2023 – With the new 30-meter trailing shoe linkage from the BlackBird product family, [Vogelsang GmbH & Co. KG](https://www.vogelsang.com) will present a spreading linkage at the **Agritechnica (Nov. 12–18, 2023, hall 23, stand B46, Hanover Exhibition Center)** that can be flexibly adapted to meet contractors' differing needs. "Thanks to the intelligent way the folds and the telescopic arm interact, we are able to offer our customers maximum flexibility in terms of working widths," says Henning Ahlers, Sales Manager Agricultural Technology Germany.

Flexible working width

Thanks to its innovative linkage section management, the new BlackBird trailing shoe linkage allows working widths of 30, 27, 24 and 21 meters without any overhang to the selected width. This innovation enables contractors to spread liquid manure precisely and efficiently on customers' fields and also means they can adapt flexibly to on-site conditions. The BlackBird 30 meter can be attached to all brands of liquid manure tanker currently on the market, making the BlackBird far more compact to transport than most of its market competitors.

Installed as standard: four ExaCut ECM precision distributors without air suction

Four ExaCut ECM precision distributors are installed as standard in the new 30-meter trailing shoe linkage. The youngest member of the ExaCut family, presented at the last EuroTier, does not need air suction and is hence a particularly compact model. Its innovative rotor concept ensures the even supply of liquid manure to the hose outlets. The ExaCut ECM therefore offers high distribution accuracy and powerful cutting force, thanks to its self-sharpening blades.

The space-saving design of the precision distributor is an important factor in meeting the specifications of road traffic regulations for maximum outside widths. It also means that

even the new large BlackBird has a legally compliant transport width of three meters when folded.

Vogelsang will present the side arm of the new 30-meter BlackBird at the Agritechnica.

**Vogelsang at the Agritechnica, November 12–18, 2023, Hanover Exhibition Center:
hall 23, stand B46**

We would be delighted to arrange a **personal appointment** for you at the Vogelsang booth on request. Please feel free to get in touch!

About Vogelsang:

Vogelsang GmbH & Co. KG, headquartered in Essen (Oldenburg) in Lower Saxony, develops, produces and sells technically high-quality, individually configurable, service-friendly machines. Founded in 1929, the company grew from manufacturing agricultural machinery to specializing in machines and solutions in the wastewater, agricultural technology, biogas, industrial and transportation technology segments. The innovative family-owned company currently employs over 1,300 people worldwide. As an internationally oriented mechanical engineering group, the company ensures the highest product quality through research, development and production at its Essen location and other production facilities, both in Germany and abroad. With 30 subsidiaries and other representatives, Vogelsang is present in over 50 countries around the world. The company has already received several accolades from the economic research institute Prognos AG, including the award “Germany’s innovation leader.” Further information can be found online at: vogelsang.info
